Purchasing of Segmentation, Access Control and Authentication at DC & Disaster Recovery (DR) Site for 03 (Three) years

Tender Ref: FSIBL/HO/ICT/2022

Date: 02.06.2022

Bidder Reg. No

Section C: Technical/Financial Specifications of Segmentation, Access Control and Authentication

Segmentation, Access Control and Authentication			
Product Names/Items	Specifications	Compliance	Remark
Brand	To be mentioned by the bidder		
Model	To be mentioned by the bidder		
Country of Origin	USA/EU		
Country of Manufacturer	To be mentioned by the bidder		
Quantity	02 (Two) Units		
Quality	ISO 9001/9002 for manufacturer		
Processor	8 core processor		
Memory	32 GB memory		
Hard Drive	1-2.5-in 600-GB 6Gb SAS 10K RPM hard disk		
Network Interface	2 x 10G base – T and 4 x 1G Base T		
Power Supplies	1 x 770W		
Specification	The propose solution should have 2 units of hardware based Network Access Control & Authentication system with support up to 10000 endpoints in the network. Currently needed 5000 premier licenses and 2 units device administration license from day one.		
Network Segmentation	<ul style="list-style-type: none">• Should segment the entire network based on the functionalities of the organization and define the scope for the users to access network depending on the segment they belong to.		
	<ul style="list-style-type: none">• Should automatically discover, classify, and control endpoint to enable the appropriate services per endpoint.		
	<ul style="list-style-type: none">• Should manage endpoint access to the network and allow actions such as move to a new VLAN, return to the original VLAN, or Isolate the endpoint, etc.		
Network Access Control and Authentication Specification	<ul style="list-style-type: none">• Should offer a rule-based, attribute-driven policy model for creating access control policies by using information about user, endpoints, posture validation, authentication protocols, profiling, etc. Should also maintain the consistency among the policies.		

Signature & Seal of the bidder

	<ul style="list-style-type: none"> • Should assign services based on the user role, group, and associated policy. 		
	<ul style="list-style-type: none"> • Should grant authenticated users with access to specific segments of the network, or specific applications and services, or both. 		
	<ul style="list-style-type: none"> • Should support guest access to the network for a limited time. 		
	<ul style="list-style-type: none"> • Should support a variety of databases, such as internal users, internal endpoints, Active Directory, LDAP, RSA, RADIUS Token Servers, Certificate Authentication Profiles, etc. 		
Policies for Client Machines	<ul style="list-style-type: none"> • Should enforce security policies by blocking, isolating and repairing non-compliant machines. 		
	<ul style="list-style-type: none"> • Should create powerful policies that include the checks for the latest OS patches, antivirus and anti-spyware software packages. 		
	<ul style="list-style-type: none"> • Should allow administrators to quickly take corrective action on risk-compromised endpoints. 		
	<ul style="list-style-type: none"> • Should classify a client machine to set up with an appropriate agent version, up-to-date compliance modules for antivirus and anti-spyware vendor support etc. 		
	<ul style="list-style-type: none"> • Should allow clients to download the required file for compliance; allow clients to click URL to access a remediation page or resource. 		
Authentication, Authorization and Accounting Protocol	<ul style="list-style-type: none"> • Should utilize standard RADIUS protocol for authentication, authorization, and accounting (AAA) 		
	<ul style="list-style-type: none"> • Should support a wide range of authentication protocols, including PAP, MS-CHAP, EAP, MD5, PEAP, EAP-FAST, and EAP-TLS. 		
Management Console	<ul style="list-style-type: none"> • Should include a built-in monitoring, reporting and troubleshooting console to assist the operators to quickly identify and resolve issues 		
	<ul style="list-style-type: none"> • Should combine authentication, authorization, and accounting (AAA); posture; profiling; and guest management services on a single platform. 		
	<ul style="list-style-type: none"> • Should support a self-service portal for device on boarding, registration and certificate enrolment. Should allow users to mark lost devices, and blacklist them on the network. 		
	<ul style="list-style-type: none"> • Should have predefined and customized device templates for endpoints, such as IP phones, printers, IP cameras, etc to automatically detect and associate authorization policies when they connect to the network. 		
	<ul style="list-style-type: none"> • Should support multiple Admin Roles and responsibilities such as Help Desk Admin, Monitoring Admin, System Admin etc. 		
Warranty	Minimum 03 (Three) years. Bidder must specify warranty and part no with support service.
